

Best Practices - Collection Seizure of Mobile Devices for Investigators

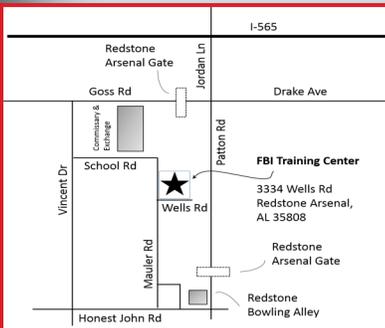

Tennessee Valley Regional Computer Forensic Laboratory
National Domestic Communications Assistance Center

Please join us for a 1 day training course designed to provide Investigators and First Responders with information related to the search and seizure of mobile devices encountered at a crime scene.

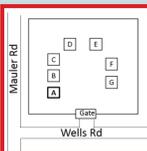

When:
April 26, 2018

8:00 AM—5:00 PM

Where:
**FBI Training Center
Classroom Building A**

FBI Training Center
3334 Wells Rd.
Redstone Arsenal, AL
35808

Questions or to Register:
Neal Jenkins
ndjenkins@fbi.gov

▶ This training will help the Investigator / First Responder to identify mobile device digital evidence and associated media, and take precautions to preserve the evidence. It also provides information related to the specialized and extensive analysis that may be conducted by forensic personnel in order to review data contained on the evidence. Finally, they will obtain a clear understanding of the required documentation and the potential for testimony related to the seizure of any digital evidence.

▶ Topics

- Crime Scene Investigation
- Evidence Collection/Preservation
- Mobile Device Identification
- Isolating and Protecting the Evidence
- Legal Perspectives of a Search
- Reporting & Testimony
- Practical Exercises
- Evidence Acquisition, Examination, and Analysis

▶ Audience

Investigators and First Responders who have no digital forensics experience and who may come across digital evidence when responding to a crime scene involving a critical incident or potential mass casualties.
